We now live in a connected universe.

IDC predicts the global market for IoT solutions will exceed \$1.29 trillion by 2020. Bain suggests the global install base for connected devices will grow to more than 75 billion by 2025. What's the impact today?

Gartner forecasts the 'connected enterprise' will dominate IoT spending in 2017, specifically cross-industry solutions for costs savings in commercial and industrial buildings.

Can you see the bigger picture?

IoT technology will revolutionize the future of facilities management with a focus on smarter buildings and smarter business models that reduce risk and increase profitability.

This changes everything.

Your business model is changing.

Your role is changing.

The technology is changing.

Are you prepared?

Gain a 360° View of Your Facilities Enterprise

ENTOUCH solves the IoT challenge for facilities executives providing one, seamlessly integrated platform to reduce energy consumption, lower overhead costs and extend asset life, empowering employees to better serve and retain customers.

Our IoT powered devices, cloud-based software and mobile application offers a single lens to view and analyze your entire distributed facilities portfolio for reduced risk and increased profitability. Multi-site retailers, restaurants, healthcare and educational facilities leverage ENTOUCH to:

- ✓ Reduce energy consumption
- ✓ Increase margins
- ✓ Extend asset life
- ✓ Create a more satisfying customer experience
- ✓ Make wise, timely decisions that effectively reduce expense

Capture The Bigger Picture With Total Facilities Intelligence

WHO WE ARE

ENTOUCH

ENTOUCH offers software, IoT powered devices, and expert advisory services as a comprehensive, 360° solution for optimized smart building management.

Our hosted Energy Management as a Service (EMaaS) model can be seamlessly integrated with your existing technology infrastructure to create immediate value and an attractive return on investment for your entire enterprise.

WHAT WE DO

A Platform For Profitability

IoT Powered Devices

ENTOUCH's IoT solution set enables multi-site companies to remotely manage facilities over a secure wireless network, supported by real-time data and instant notification from open standard controls and sensors.

Cloud-Based Software

Our fully hosted and managed cloud-based platform lowers capital expense, reduces maintenance costs and provides limitless scalability on a fixed subscription model.

Expert Advisory Services

Count on our turnkey installation, rapid deployment and dedicated account management team to guide your journey to a connected enterprise every step of the way.

Support

Our 24/7 command center monitors everything – we proactively analyze your facility data; identify patterns, trends and inconsistencies; and work with your team to resolve HVAC, refrigeration or lighting issues. We also provide custom reporting so you can track activity anytime, anywhere from your smartphone, tablet or computer in real-time.

"El Pollo Loco partnered with ENTOUCH in December of 2015 to drive energy savings and sustainability with aggressive delivery expectations in hopes to hit the ground running in 2016. ENTOUCH executed flawlessly on our timeline and successfully deployed phase one in only two weeks so that we could immediately begin tracking our return on investment."

- Daniel Milojevich

El Pollo Loco

End-To-End Value Creation

ENTOUCH creates efficiencies across your enterprise that deliver value in 5 distinct ways to reduce risk and increase profitability:

Connectivity

Our technology streamlines and automates facility management by integrating legacy technology, utility billing and computerized maintenance management systems (CMMS) for a more unified, connected array of assets and resources.

360° Visibility

Leveraging easy-to-read, sophisticated dashboards, your facility management team gains immediate awareness of asset conditions and operational costs, enabling them to proactively adjust and correct systems in real-time.

Control

Smart control over your facilities yields reduced energy consumption, improved facility comfort and lower operating and capital expense, with fewer maintenance truck rolls and proactive maintenance to extend the life of your facility assets.

Analytics

Our powerful data processing engine provides rich analytic input to decision-makers, allowing them to drill deep into the details, compare and contrast trends, project and forecast outcomes, with dedicated subject matter experts readily available to support.

Optimization

By gaining a connected, transparent facility ecosystem that proactively drives decisions and enhances control, you effectively create a sustainable environment marked by low cost, high efficiency, enhanced margins and a robust bottom-line.

WHAT MAKES ENTOUCH UNIQUE

Our Technology Changes the Game

Only ENTOUCH can deliver a comprehensive, turnkey smart building solution, connecting your entire enterprise for total facilities intelligence.
